Vacuum Vessel System – Spin Vacuum Chamber Components BEPeterson

BEPeterson has recently completed components used in a Vacuum Vessel System. This is a spin vacuum chamber used to test parts at high speeds in a vacuum. The top lid needs to seal with the spin chamber assembly and the top lid is attached to the lift arm and rides up and down on the lift column. The parts supplied by BEPeterson consisted of: 1) Vacuum Chamber 2) Chamber Lid 3) Machine Base 4) Lift Arm and 5) Lift Column

BEPeterson

About BEPeterson

Since 1935 BEPeterson has set the standard for custom metal fabrication of heavy-gauge metal parts and equipment. BEP has been relied on by our customers to provide complete engineering, design and project management of the most critical components. We are ISO 9001:2015 certified and ASME certified. Our 90,000 square foot facility with high ceiling bays is one of the largest in the Northeast.

BEPeterson is both a high volume contract manufacturer and a custom metal fabricator. BEP utilizes advanced manufacturing techniques and low cost material procurement to supply consistent and repeatable high quality products to our customers.

BEP manufactures Pressure Vessels, Tanks, ASME pressure vessels & tanks, ASME code and non-code vacuum chambers and vacuum furnaces, filter vessels & housings, skid assemblies, ducting and a variety of industrial metal fabrications.

Buyers in the power and utilities, medical, chemical, environmental/filtration and industrial marketplaces choose to partner with BEPeterson because they value the fact that BEPeterson offers more than mere fabrication capabilities. BEPeterson can optimize our customer's requirements for cost, delivery and quality.
