PRESS RELEASE PRESS RELEASE PRESS RELEASE PRESS RELEASE

ASME Pressure Vessels manufactured by BEPeterson for use in the Water filtration industry

BEPeterson has recently manufactured two ASME Pressure Vessels to be used in the water filtration industry. The pressure vessels are 60" OD x 106" OAH - Designed to 200 PSI @ 200 PSI @ 159 Deg F. Material of construction was 316/L SS. The vessels were bead blasted on the exterior. Wedge wire filter internals and sight glasses were installed prior to shipment. The pressure vessels were supplied to the Alaska Native Tribal Health Consortium for installation in Chignik Bay Alaska. Michelle Girard, Program Manager at ANTHC stated, "Thank you for all your effort on this project. It's been a pleasure working with you and your team as well. Work in rural Alaska poses significant challenges and obstacles. We are very appreciative when an award goes as smoothly as this one has and we value your participation in helping ANTHC fulfill its mission". Daniel Szczurko, Vice President Business Development states, "BEPeterson is a leading custom pressure vessel fabricator with significant experience in the water filtration industry. Our team of design engineers and quality assurance inspectors guarantee our customers exceptional product and timely deliveries. BEPeterson values our customers and manufactures ASME pressure vessels for many years of carefree operation".

About BEPeterson

Since 1935 BEPeterson has set the standard for custom metal fabrication of heavy-gauge metal parts and equipment. BEP has been relied on by our customers to provide complete engineering, design and project management of the most critical components. We are ISO 9001:2015 certified and ASME certified. Our 90,000 square foot facility with high ceiling bays is one of the largest in the Northeast.

BEPeterson is both a high volume contract manufacturer and a custom metal fabricator. BEP utilizes advanced manufacturing techniques and low cost material procurement to supply consistent and repeatable high quality products to our customers.

BEP manufactures Pressure Vessels, Tanks, ASME pressure vessels, ASME tanks, ASME code and non-code vacuum chambers, ASME vacuum furnaces, filter vessels & housings, skid assemblies, ducting and a variety of industrial general fabrications.

Buyers in the power and utilities, medical, chemical, environmental/filtration and industrial marketplaces choose to partner with BEPeterson because they value the fact that BEPeterson offers more than mere fabrication capabilities. BEPeterson can optimize our customer's requirements for cost, delivery and quality.
